# Humphrey

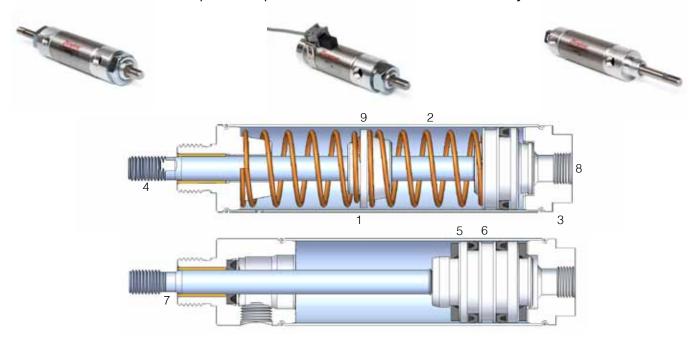

#### **AIR CYLINDERS**

ISO:13485:2003 registered ISO:9001:2008 registered

outstanding design and construction...
superior performance and reliability

- 1. **Barrel** Stainless steel (Type 304). Drawn and polished I.D. provides ideal lube-holding, low friction surface. Matte finish on O.D. Barrel attached to heads by Humphrey roll-forming process.
- 2. **Return Springs** High tensile strength music wire. Shotpeened...to relieve stresses for longer life.
- 3. **Heads** Aluminum. Internal face grooved for positive air flow to piston seals.
- 4. **Piston Rod** 303 Stainless Steel standard all models. Wrench flats, standard on most models, and chamfered for easy wrench contact without rod damage. Threads are roll formed for strength and durability.
- 5. **Piston** Unique Humphrey Piston may be factory assembled in two different ways same overall dimensions with or without bumpers. Piston threads are Roll Formed for strength and durability.

- 6. **Seals** Buna N standard on all models. Fluorocarbon (Viton...Option F) available for high ambient temperatures, for extremely high cycling conditions with limited lubrication or mild chemical resistance (air supply contaminants and/ or lubricants). Seal design ensures constant contact with cylinder barrel eliminating seal collapse and blowby.
- 7. **Rod Bushing** Oil permeated bronze. Ball-sized to close tolerance... provides rod support and smooth, low friction rod movement for longer cylinder life.
- 8. **Pressure Ports** Full, unrestricted porting for maximum air flow...combines with groove in heads to provide fast cylinder response and smooth rod movement.
- 9. **Spacers** Spacers ensure a uniform spring rate and prohibit collapse of springs, providing maximum life.
- 10. **Accessories** (see page 20 & 21) Steel mounting nuts, mounting brackets, rod clevises, etc., are burnished and bright zinc plated.

### Humphrey cylinder selection guide

Air cylinders have an excellent ability to provide fast response and rapid movement from the energy of compressed air. Rapid indexing, stamping, punching, part location,

etc., are ideally suited to air cylinders. Applications requiring extremely slow and smooth, or precise movement are more difficult to satisfy due to the compressibility of air. Consult Factory.

#### mounting

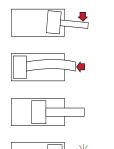

Mount to centerline of work to avoid side load on rod. Mount securely, without over-torquing mounting nuts. Check frequently for loose mountings. A secure mount, accurately placed, promotes cylinder performance and endurance. Side load on rod should be eliminated. Severe side load or stress

can cause rod breakage, excessive bushing wear, and scoring of piston/barrel. Consider Option N (Wearstrip).

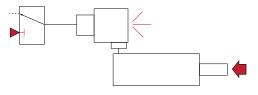

Reduce adverse effect of side load by attaching a universal rod eye to the piston rod. Also, consider utilizing only part of total stroke...keep piston "back" in barrel for greater column strength.

Avoid "bottoming-out" piston on cylinder heads at high pressures. Consider Option B (Bumper).

#### lubrication

All models are factory prelubricated for optimum life and performance. Periodically lubricate internally with a non-detergent mineral-base oil. Automatic air line lubricators are most commonly used. To solve lubrication problems due to lubricant backflow during control valve exhaust cycle, install a Humphrey quick exhaust valve directly to the cylinder port. This stops backflow and allows progressive flow of oil to cylinder. Avoid using higher pressure than is actually required. Nominal air pressure provides optimum cylinder life, reduces use and cost of compressed air, and saves energy.

#### air cylinder application factors

#### single acting types

# spring return

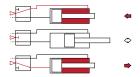

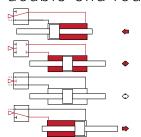

- Spring return (single acting): Air pressure produces force in one pushing direction only, causing rod to extend.
- Spring extend (single acting reverse): Air pressure produces force in one pulling direction only, causing rod to retract.
- Spring returns rod to normal position in one quick motion, determined by control valve's
  flow capacity and cylinder volume. Flow control (metering) of exhausting air during return
  stroke does not provide optimum smoothness of movement (consider Double Acting
  models for smoothest movement).
- Only one 3-way valve is required...less expensive than valving for double acting cylinders.
- Consider when compressed air supply is limited or must be conserved.
- Mount to insure that vent in side of barrel can breathe freely.

#### double acting types

#### double acting

#### double-end rod

- Air pressure produces force in either pushing or pulling direction. Pushing force is greater than pulling force due to smaller effective piston area on rod side of piston.
- Flow control (metering) of exhausting air can be performed in either direction. Air exhausts from the cylinders port opposite the port being pressurized. For smoothest movement, meter the exhausting air. Metering of the incoming pressure may produce erratic, jumpy cylinder action.
- Closed system. No vent (breather hole) to consider; see Single Acting above. Consider, when cylinder must operate in dirty ambient conditions.
- Air pressure produces equal force in both pushing and pulling directions due to equal piston area. Pressurizing both sides locks cylinder position in any given point.
- Fixed mounting of both rod ends allows movement of barrel only... barrel moves back and fourth and rods are stationary. Caution: Do not side load rod (barrel weight, alignment, etc.).
- One rod can be used to perform a work function while second rod:
  - Permits operation of limit switches away from work function.
  - Permits attachment of guiding methods to eliminate rod rotation (alternate to hex rod)
  - Provides additional support to guard against rod deflection.

#### specifications

FORCE (F) is determined by square inches of piston area (A), and pressure (P) in PSIG.  $E-A \lor P$ 

VOLUME (V) in cubic inches is determined by square inches of piston area (A), and length of stroke (L). V=AxL.

SPEED is affected by many variables (including force to move load, cylinder volume, control valve flow capacity, length of supply lines, etc.) making precise calculations difficult.

For Compressed Air to 200 PSIG

Ambient Temperature: -40°F to 160°F ...as standard

Ambient Temperature: -20°F to 400°F with Fluoroelastomer seals

#### comments

- Standard strokes are in 1" increments (1/2" for model code 8).
  Fractional strokes also available.
  Consult factory. Stroke tolerance is 1/32".
- Longer than standard stroke lengths are available. Consult factory.
- When specifying longer than standard stroke lengths, consider possible rod deflection, adequate lubrication, high speed friction, etc. No warranty.

#### example: 7-D-4BN (Cylinder with bumpers and wearstrip)

option	option decription
А	SIDE PORTED REAR HEAD - Locates rear port on side of body. Available on type D, S and SH (See product pages for details).
В	<b>BUMPER</b> - Reduce mechanical noise - Absorb shock - Negligible stroke change due to compression set - Buna N standard. (Viton Bumpers standard when option B is ordered with Option F.) - Single Acting Models - one bumper opposite spring side on piston - Double Acting Models - one bumper on both sides of piston - Standard on type D2EY.
F	FLUOROELASTOMER SEALS (VITON) - For ambient temperatures of -20° ~ 400° F.
J	ROTATE FRONT HEAD 90 - Front head is rotated 90° clockwise from rear port, viewed from rod end.
К	ROTATE FRONT HEAD 180 - Front head is rotated 180° clockwise from rear port, viewed from rod end.
L	ROTATE FRONT HEAD 270 - Front head is rotated 270° clockwise from rear port, viewed from rod end.
М	INTERNAL MAGNET - For use with Humphrey Sensor Switches (see page 6). Factory installed on type D, DP, and BFD. Option B (Bumpers) not available with Option M cylinders. Consult factory for others.
N	<b>WEARSTRIP</b> - Protects pistons and barrel from wear due to minor rod deflection - Standard on type D, DP, and BFD with 5 inches or more of stroke. Standard on type SR and SRP with 3 inches or more of stroke. Not available on Model 8.
Р	POLYPAK ROD SEALS - Provides excellent rod sealing capabilities at low pressures.
R	ROTATED REAR PIVOT TANG - Rotation of rear pivot tang 90°. Port remains in original position.
Т	PIVOT PIN IN REAR TANG - Pivot pin pressed into rear tang. No bracket available. Not available in Models 3 and 4.
W	ROD WIPER - Provides a wiping action to remove most foreign material from exposed rod while maintaining adequate lubricating film. Protect rod and primary rod seal. Available on all Type D, DP, SR and D2EY Models. Not available on Model 8.
U	<b>REAR PIVOT BUSHING</b> - Bushing in rear pivot hole. Hole diameter remains the same. Available on SP, SHP, SRP, DP of models 7, 6, 25, & 5. Standard on model 3 and 4. Note: Model 5 cylinders have no threads on tang (tang diameter is 1.0 inch).

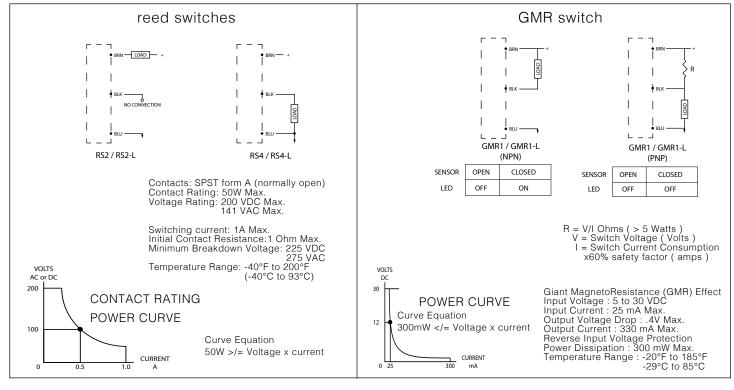

#### with position sensing

Humphrey double acting air cylinders, type D, DP, and BFD may be ordered with Option M, an internal magnet factory installed on the reversible piston, permitting use with position sensing switches. Cylinder models with Option M are interchangeable in length with other Humphrey air cylinders, facilitating conversions of existing applications.

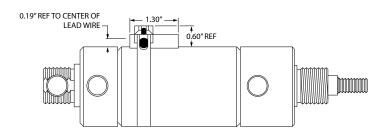

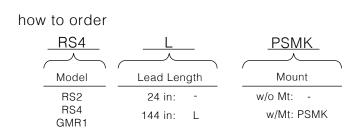

#### sensor switches

lead length: 24 inches standard lead length: 144 inches = Option L

PSMK Mounting Kit: Mounts sensor to Humphrey Cylinder. Assembly instructions are included with shipment.

### Humphrey deluxe rod ends

Exclusive with Humphrey Air Cylinders (except SH, SHP, and D2EY models), you may choose from 15 unique, custom rod-end design selections, and have Humphrey tailor it to your exact requirements.

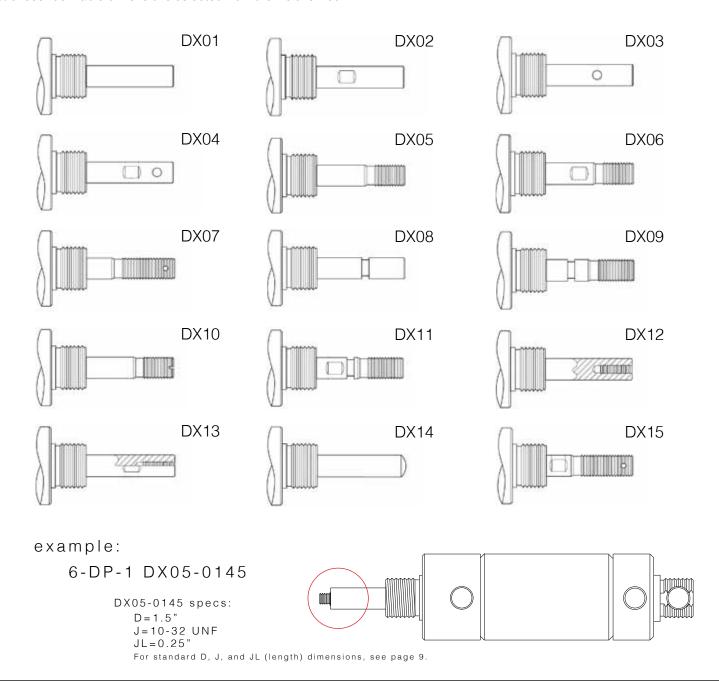

The 15 themes are shown below, and address customizable features such as rod extension length, wrench flat position, male or female rod thread and rod thread length, plain rod end, rounded rod end, ring grooves, rod diameter reductions, and (cotter) pin holes.

Each of the 15 different rod end selections includes a specific set of user definable dimensions selected from the Deluxe Rod

End Workbook. Expect normal lead times and no minimum order quantities. A unique model number is assigned at the initial build cycle. That part number is permanently available for future orders of the same make.

Examples of part numbers utilizing codes below are: 7-S-2 DX01-00137 and 5-DP-10N DX12-01098.

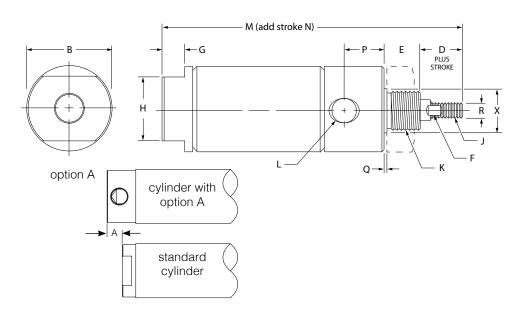

Contact your authorized stocking distributer or visit our website for details and to download the Deluxe Rod End Workbook (Search "DX").

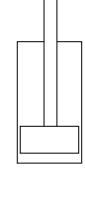

#### D-type double acting / nose mount

- Stainless steel rod, standard.
- Simple, reliable design.
- Requires air pressure to extend and retract rod.
- Extend force exceeds retract force (smaller effective area on rod side of piston).
- Exclusive Humphrey reversible piston.
- Specify option M (internal magnet) to operate sensors.
- Wearstrip standard: 5 inches or more of stroke (optional on shorter strokes. N/A on model 8).
- Options: A, B, F, M, N, P and W.
- Mounting nut included, except model 4 & 3 (order separately).
- Available accessories foot mount and rod clevis. See pages 20-21.

For product configuration utility, 3D CAD viewer, and 3D CAD. Model downloads, Visit www.humphrey-products.com.

<sup>\*</sup> model 8 only - add 0.399 for Option M.

D2EY-type double acting - double end rod / double end mount

- Air pressure produces equal force in both directions due to equal piston area; permits locking in mid stroke.
- One rod can be used to perform work function, second rod to operate limit switches, provide support or guide.
- Fixed mounting of both rod ends allows movement of barrel only.
- Bumpers and Stainless steel rod, standard.
- Options: F,J,K,L,N,P,W.
- Two mounting nuts included, except Model 3 & 4 (order separately).
- Available accessories foot mount, mounting nut and rod clevis, see pages 20-21.

For product configuration utility, 3D CAD viewer, and 3D CAD. Model downloads, Visit www.humphrey-products.com.

S-type single acting / nose mount

- Stainless steel rod, standard.
- Economical requires air pressure only to extend rod.
- Stress relieved spring/s retract rod.
- Options: A, F and N.
- Mounting nut included, except model 4 (order separately).
- Available accessories: foot mount and rod clevis, see pages 20-21.

### Humphrey<sup>®</sup>

• air cylinder accessories are made of carbon steel • burnished for surface smoothness • bright zinc plated for corrosion resistance

#### accessories

#### pivot bracket

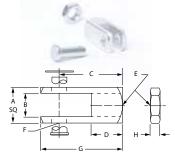

- for use with pivot cylinders
- cylinders can pivot through 120°
- one-piece construction for strength and ease of cylinder installation/removeal
- pivot pin and cotter pin supplied (available seperately order by part number)

	Model Number	Cylinder Bore Sizes (model code)	А	В	С	D	E	F	G	Н	J
	BP-8-C	1/2 (8)	.20	.52	.43	.54	.22	.16	50°	.64	.75
	BP-11-C	3/4 (7) & 1/16 (6)	.26	.65	.75	.87	.31	.26	53°	.87	1.19
r	BP-25-C	1 1/4 (25)	.32	.77	.75	.94	.31	.26	53°	1.06	1.25
1	BP-15-C	1 1/2 (5) & 1 3/4 (75)	.39	.96	1.00	1.25	.38	.38	52°	1.37	1.63

#### rod clevis

- for use on all cylinders
- smooth beveled ends
- locknut, clevis pin and cotter pin (available separately. Order by part number).

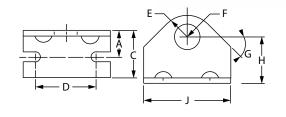

Model Number	Cylinder Bore Sizes (model code)	А	В	С	D	E	F	G	Н
CT-8	1/2 (8)	.38	.19	.75	.38	10-32	.19	.94	.12

### **Humphrey** volume chambers

C, CP, CPP types standard / end mount / double end mount

- C type: standard inline mount
- CP type: end mount
- CPP type: double end mount
- For vacuum or air
- Ideal for time delay circuits
- Stainless steel barrel
- Aluminum end caps
- Options: A and AA side porting.

	la a u a	volume in <sup>3</sup>							
bore code	bore dia. in.	basic volume*	add per 1.0 inch length						
8	1/2	.11	.20						
7	3/4	.40	.44						
6	1 1/16	.88	.89						
25	1 1/4	1.44	1.23						
5	1 1/2	1.68	1.77						
75	1 3/4	3.29	2.41						
4	2	4.04	3.14						
3	2 1/2	6.38 4.91							

<sup>\*</sup>add this volume to sum of the per inch volume.

This basic volume exists before any 1-inch increments are added.

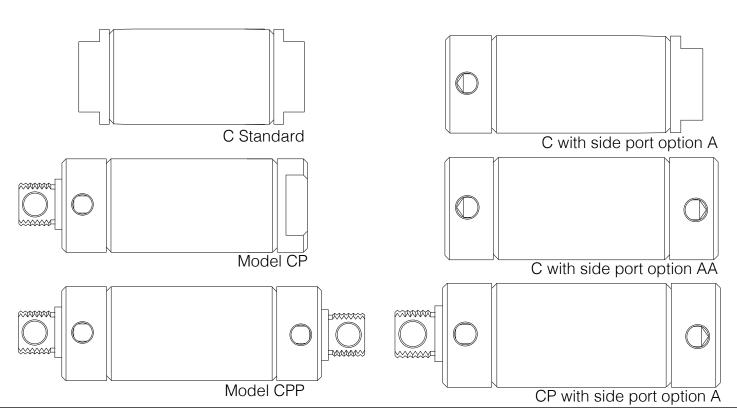

#### how to order

example:

7-C-6A

5-CP-4

8-CPP-2-1/2

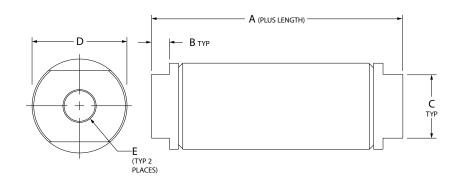

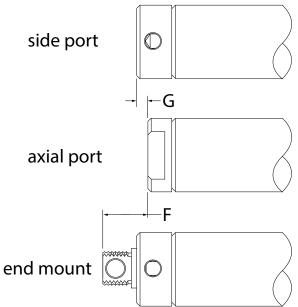

### Humphrey volume chambers dimensions

			C	dimension	s		
bore	Α	В	С	D	E (NPSF)	F	G
8	1.35	.11	.37	.56	10-32 UNF	.96	.19
7	1.91	.16	.62	.81	1/8	1.35	.44
6	2.18	.25	.88	1.11	1/8	.88	.25
25	2.67	.18	.87	1.30	1/8	1.08	.31
5	2.26	.25	.88	1.55	1/8	1.06	.19
75	2.57	.25	1.24	1.80	1/4	1.56	.56
4	2.81	.32	1.25	2.07	1/4	1.37	.37
3	2.81	.31	2.07	2.61	1/4	1.37	.37

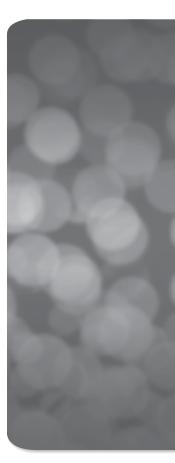

- For side porting, (option A) add dimension A & G to desired length. (double the G dimension for option AA, side porting both ends.)
- For end mount add dimension
   A & F to desired length. (Double
   the F dimensions for end mount
   both ends.)
